

## MFGA Green Gold Report – June 16 , 2021 – CENTRAL

Reports for Optimum Alfalfa Harvest Date cover Manitoba’s Central, Western, Eastern and Interlake areas.

SITE	RFV NIR	RFV PEAQ	Height	CP
Austin	142	146	31	19
Gladstone	146	146	31	19
Horndean (Harvested)	-	-	-	-
MacGregor	156	182	23	25
Manitou – Central	-	-	-	-
Manitou – South of Town	153	178	24	21
St. Leon	-	-	-	-
Treherne (Harvested)	-	-	-	-
<b>CENTRAL AVERAGE</b>	<b>149</b>	<b>163</b>	<b>27</b>	<b>21</b>

Flowering has presented itself in the fields. The moisture increased the height in certain areas with the heat that came along with it. The RFV has decreased by 14 pts or 7 pts/day in 2 days.

## **Last Report for 2020**

As MFGA's Green Gold program winds up for 2020 I would like to take this opportunity to thank the producers that provided fields and/or submitted samples so that we could put together an overview of how alfalfa was progressing across the province for other forage producers in the province.

For the **Eastern** area: Thanks to Richard Boonstoppel, Jacob Roehle, and Jim Lintott

For the **Central** area: Thanks to Davis Wright, Claudette Pshebniski, Andy & Terry Keen, Calvin Plett, Ryan Rempel, and Arlene Metzler

For the **Western** area: Thanks to Gerry Gourley, Ryan Boyd, Ron Kendrick, Jean Born, and Jordan Dickson at MBFI

Finally a special thanks to Tim Clarke with Mb Ag and Resource Development who continue to support and promote forage management throughout the province.

## **Producer Support Always Welcome**

If you are finding the information in MFGA's Green Gold reports useful why not consider becoming a member and help support the association so that we can continue to provide information like this. Help us continue to make an impact. **Starting at just \$50 per year for individual support**, you can be part of our association. **Please visit [mfga.net](http://mfga.net) and join us.**
